

During the school year, the camps will be held for the holidays of Sukkot, Hanukkah, Purim, Passover and Lag Ba'Omer according to the dates announced by the Ministry of Education (see [holidays calendar](#) which is updated every year).

We also provide solutions for the first two weeks of the summer holiday.

We try to provide as wide a response as possible to parents even during vacations of the educational frameworks, therefore the activity hours of the camps are also from 8:00 a.m. to 4:00 p.m.

The camps are held in the kindergarten and in the activity spaces available.

We prepare for summer camps with the best of our manpower and a lot of thinking and investment is put into planning and executing the summer camp programs.

We make sure to combine creative activities, experiential activities in the field (movement activities), baking and cooking, social activities and relaxed activities according to the hours. The meals at the camps are also varied according to the needs and wishes of the children.

It is important for me to point out that in principle the summer camps will only take place if there is no response in the educational frameworks (school/kindergarten for the holidays) and for that we work in cooperation with the settlement's education committee in a way that best meets the needs of the parents under the existing conditions.
